

Standard Operating Procedure

FARM NAME _____

Doc.No. **2.40**

Title: **Cleaning and Storing Personal Protective Equipment***

Effective Date: _____

Reviewed by: _____ GAP Coordinator, Date: _____

1. All handlers will be provided appropriate personal protective equipment in clean and operating condition.
2. PPE is stored in an area away from pesticide storage and mixing.
3. All PPE is washed separately from personal clothing. (A designated washer for PPE is preferred.)
4. Thoroughly wash and dry PPE before it is stored or put it in a well-ventilated place to dry.
5. Replace respirator filters and cartridges according to manufacturer's recommendation.
6. Discard coveralls or other absorbent materials that have been drenched or heavily contaminated with undiluted pesticide.
7. Gloves should be of the type specified on the label for handling specific materials.
